THE

Mineralogical Magazine

AND

JOURNAL

OF THE

MINERALOGICAL SOCIETY

(Instituted February 3, 1876)

Edited by L. J. SPENCER, C.B.E., F.R.S.

VOLUME XXIV

(Nos. 148–159, 1935–1937)

LONDON

HUMPHREY MILFORD, OXFORD UNIVERSITY PRESS,

Amen House, Warwick Square, E.C. 4.

1937

TABLE OF CONTENTS [1]

[No. 148. MARCH, 1935.]

PAGE

Bye-Laws and List of Members vii

Proceedings of the Mineralogical Society for 1934 xxxi

B. Lightfoot, A. M. Macgregor, and E. Golding: The meteoric stone seen to fall in the Mangwendi native reserve, Southern Rhodesia, on March 7, 1934 1

L. J. Spencer: Murnpeowie (South Australia), a granular type of meteoric iron. (With Plates I–III) 13

J. A. Watson: Colour reactions in the micro-chemical determination of minerals. (With Plate IV) 21

A. W. Groves: The determination of small amounts of copper in rocks 35

A. R. Alderman: Almandine from Botallack, Cornwall . . . 42

[No. 149. JUNE, 1935.]

F. A. Bannister: The crystal-structure of the bismuth oxyhalides. With chemical syntheses by M. H. Hey 49

E. D. Mountain: Two new bismuth minerals from South Africa . 59

L. Hawkes and J. A. Smythe: Ankerites from the Northumberland coal-field 65

M. H. Hey: A new apparatus for the determination of carbon dioxide 76

H. H. Read and I. S. Double: On the occurrence of chondrodite in the Glenelg limestone of Inverness-shire 84

J. G. C. Anderson and S. Elder: Apophyllite from Traprain Law, East Lothian 90

C. E. Tilley: The rôle of kyanite in the 'hornfels zone' of the Carn Chuinneag granite (Ross-shire) 92

[No. 150. SEPTEMBER, 1935.]

M. H Hey: Studies on the zeolites. Part VIII. A theory of vapour pressure of the zeolites, and of the diffusion of water or gases in a zeolite crystal 99

F. Walker: The late Palaeozoic quartz-dolerites and tholeiites of Scotland. (With Plate V). 131

L. J. Spencer: Fictitious occurrences of iron silicide (ferrosilicon) . 160

R. Walls: A critical review of the data for a revision of the enstatite-hypersthene series 165

A. F. Smethurst: Anomalies in the analytical determination of water in epidote. 173

[No. 151. DECEMBER, 1935.]

C. E. Tilley: Metasomatism associated with the greenstone-hornfelses of Kenidjack and Botallack, Cornwall. (With Plates VI and VII) 181

W. Q. Kennedy: The influence of chemical factors on the crystallization of hornblende in igneous rocks 203

W. H. Taylor: An X-ray examination of substituted edingtonites . 208

N. F. M. Henry: Some data on the iron-rich hypersthenes . . 221

[1] The separately-paged Mineralogical Abstracts issued with each part form a separate volume.

[No. 152. MARCH, 1936.]

PAGE

Proceedings of the Mineralogical Society for 1935 xliii

M. H. Hey: Studies on the zeolites. Part IX. Scolecite and metascolecite. With X-ray measurements by F. A. Bannister. (With Plates VIII and IX) 227

A. Brammall and S. Bracewell: Variability of garnets in granites 254

A. Brammell and B. R. Rao: The variable composition of cordierite in the Dartmoor granites 257

A. Brammall and D. L. Dowie: The distribution of gold and silver in the crystalline rocks of the Malvern Hills 260

C. O. Hutton: The Morven meteorite, an aerolite from South Canterbury, New Zealand 265

[No. 153. JUNE, 1936.]

L. J. Spencer: Biographical notices of mineralogists recently deceased. (Sixth series) 277

A. Russell: Notes on the occurrence of fluorite in Aberdeenshire and Banffshire 307

A. Russell: Baryte crystals from Manvers Main colliery. Wath-upon-Dearne, near Rotherham, Yorkshire 318

A. Russell: Notes on the occurrence of wulfenite at Brandy Gill, Cumberland, and of leadhillite at Drumruck mine, Kirkcudbrightshire 321

F. A. Bannister: Ettringite from Scawt Hill, Co. Antrim. With a chemical analysis by M. H. Hey, and a note on the crystal-structure by J. D. Bernal. (With Plate X) 324

[No. 154. SEPTEMBER, 1936.]

C. E. Tilley: Eulysites and related rock types from Loch Duich, Ross-shire 331

C. T. Barber: The effects of heat on the optical orientation of plagioclase felspars 343

L. J. Spencer: Two new meteoric stones from South Australia—Lake Labyrinth and Kappakoola 353

A. Brammall: The reciprocal role of alumina in reaction series . 362

[No. 155. DECEMBER, 1936.]

D. L. Reynolds: Demonstrations in petrogenesis from Kiloran Bay, Colonsay. I. The transfusion of quartzite. (With Plates XI and XII) 367

A. Holmes: Transfusion of quartz xenoliths in alkali basic and ultrabasic lavas, south-west Uganda. (With Plate XIII) . . 408

C. E. Tilley: The paragenesis of kyanite-eclogites 422

W. Q. Kennedy: An occurrence of greenalite-chert in the Ordovician rocks of the southern uplands of Scotland 433

[No. 156. MARCH, 1937.]

PAGE

Proceedings of the Mineralogical Society for 1936 lvii

L. J. SPENCER: The Tenham (Queensland) meteoritic shower of 1879. (With Plates XIV–XVII) 437

E. SPENCER: The potash-soda-felspars. I. Thermal stability. (With Plate XVIII) 453

W. A. DEER: The composition and paragenesis of the biotites of the Carsphairn igneous complex 495

L. J. SPENCER: The tektite problem 503

[No. 157. JUNE, 1937.]

A. BRAMMALL, J. G. C. LEECH, and F. A. BANNISTER: The paragenesis of cookeite and hydromuscovite associated with gold at Ogofau, Carmarthenshire. (With Plate XIX) . . . 507

G. VAUX: X-ray studies on pyrolusite (including polianite) and psilomelane. With chemical analyses by H. BENNETT . . . 521

K. TSURU and N. F. M. HENRY: An iron-rich optically-positive hypersthene from Manchuria 527

C. O. HUTTON: An occurrence of the mineral pumpellyite in the Lake Wakatipu region, western Otago, New Zealand. . . 529

G. A. JOPLIN: An interesting occurrence of lawsonite in glaucophane-bearing rocks from New Caledonia 534

M. J. WHITEHOUSE: The deuteric mineral sequence in the Enoggera granite, Queensland 538

[No. 158. SEPTEMBER, 1937.]

B. W. ANDERSON and C. J. PAYNE: Magnesium-zinc-spinels from Ceylon. With a chemical analysis by M. H. HEY . . . 547

C. E. TILLEY: The paragenesis of kyanite-amphibolites. With chemical analyses by H. C. G. VINCENT. (With Plate XX) . 555

C. E. TILLEY: Wollastonite solid solutions from Scawt Hill, Co. Antrim 569

M. PERUTZ: 'Iron-rhodonite' (from slag) and pyroxmangite and their relation to rhodonite 573

A. T. J. DOLLAR: An integrating micrometer for the geometrical analysis of rocks 577

F. C. PHILLIPS: A universal ore-polishing machine. (With Plate XXI) 595

L. J. SPENCER: Fourteenth list of new mineral names . . . 601

[No. 159. DECEMBER, 1937.]

Title-page and Contents.

Index, Errata and Addenda 629

DESCRIPTION OF PLATES

PAGE

Plate I–III. Meteoric iron of Murnpeowie, South Australia (L. J. Spencer) 20

„ IV (Table). Micro-chemical colour reactions (J. A. Watson) 34

„ V. Quartz-dolerites and tholeiites of Scotland (F. Walker) 159

„ VI–VII. Greenstone-hornfelses of Kenidjack and Botallack, Cornwall (C. E. Tilley) 202

„ VIII-IX. X-ray photographs of scolecite, metascolecite, and natrolite (M. H. Hey and F. A. Bannister) . . 253

„ X. X-ray photograph of ettringite (F. A. Bannister) . . 329

„ XI–XII. Petrogenesis from Colonsay (D. L. Reynolds) . . 406

„ XIII. Micro-sections illustrating transfusion phenomena from Uganda and Colonsay (A. Holmes) 421

„ XIV–XVII. Meteoric stones from the Tenham (Queensland) shower of 1879 (L. J. Spencer) 452

„ XVIII (Table). The potash-soda-felspars (E. Spencer) . . 494

„ XIX. X-ray photographs of cookeite and related minerals (A. Brammall, J. G. C. Leech, and F. A. Bannister) . 520

„ XX. Kyanite-garnet-amphibolites from Glenelg (C. E. Tilley) 568

„ XXI. A universal ore-polishing machine (F. C. Phillips) . 600
